**Intelligence Built Around Your Needs.**

## Multi-Int by Airbus

Airbus Defence and Space offers a coherent catalogue of innovative technical solutions covering the whole intelligence cycle, from multi-sensor data collection to the exploitation of data through fusion, authentication and analysis.

Our multi-intelligence centres benefit from access to Airbus' unrivalled satellite constellation. They can be deployed at different hierarchical levels on networks with various security levels, ensuring the correct information is received as and when required to enhance and support decision-making.

## 40 years experience

We are recognised as a world leader in geospatial data provision and defence intelligence with unrivalled expertise in satellite imagery acquisition, data processing, fusion, dissemination and intelligence extraction.

## Interoperability

Interoperability is at the heart of the intelligence cycle and our multi-intelligence solution is compliant with most interoperability standards, doctrines, procedures and equipment.

Our solutions can easily interface with customer legacy capabilities and 3rd party solutions.

## Scalability and flexibility

Our multi-intelligence solution gives a maximum flexibility to tailor the deployment of different configurations for diverse intelligence missions. This approach enables adaptation and growth of the configuration according to customers' needs.

## In-Service support

We provide a comprehensive training and maintenance programme to ensure successful delivery and operation of our solutions. Our expert service teams will support and assist you during the entire life-cycle of your systems.

# Information superiority at the core of C5ISR

## Main use cases

- Central strategic Intelligence
- Military operational Intelligence
- Deployable asset for tactical use
- Maritime and security Intelligence

## Can be specifically customised for

- Image Intelligence (IMINT) Centre
- Electronic Intelligence (ELINT) Centre
- Geospatial Intelligence (GEOINT) Centre
- Information Warfare
